Epic Link:	Utilize Yoodlize Epic

Scope, Objectives, and Risks:	**Scope**
	- We will be testing the alpha release of fully functional rental web application Yoodlize.
	- Will be testing the roles of Guest User and User with an account.
	- Will not be testing Admin/Power User roles.
	- Yoodlize is currently functional only in the USA.
	Objective
	To improve the usability and functionality of the web application Yoodlize.
	Risks
	Project Risks
	- QA team does not have direct communication with design or developer teams. Mitigation: AJ has given us a list of user stories and should be contacting developers to get requirements documentation. Contingency: Learn as we go.
	Product Risk
	- We do not know when the next developer update will arrive. Mitigation: Try and get in touch with developers. Contingency: Make sure we are all refreshing the app before we test.

Overall Approach:	- Our testing will be manual and automated.
	- Will take steps to automate after the first round of manual testing.
	- All efforts are reactive as testing is wholly done after development.

Coordination of Test Activities:	Splitting the key components of the web app among the 4 QA specialists. Roshin- Rent Jared- List

	Jake- Browse Bracken- Account management
What, Who, How?:	**Browse** Jake Logged in or Guest User 1. I should be able to browse (search bar at top of screen) from any page on the Yoodlize app. 2. On the home page I can click on an item go to the item page and see a description. 3. I can mouse over an item on the home page and see a description. 4. All text that looks clickable does something. 5. I can use "Browse Categories" on the bottom of the home page. 6. I can search using the map, using "search as I move the map" feature. 7. All the filters work, and I can search by: • Category • Keyword/Location • Availability • Ratings • Price **List** Jared • Owner to verify any account information (email, Facebook, Google & Document) to List items? • Automated requests/tips to verify account information? • Editing and republishing listings. • Deleting listings • Description boundary values. • Additional rules boundary values. • Upload documents feature for additional rules (for legal contracts or pre-written information)? • Listings "Sort" drop-down menu functionality. • Image types/sizes boundaries. • Title boundary values. • Address map accuracy. • Address/location viewable by any other way than the map (general city/state/country information or distance from renters current location)? • Available dates viewable? • Rate input boundary values. **Rent** ⟨⟩ UY-9 OPEN Roshin Homepage: *Guest Renter/Renter Logged In/Renter not Logged In* 1. Can mouse over an item on the home page and see a description. 2. Can click on an item go to the item page and see a description. 3. Can use "Browse Categories" from the bottom Once an Item is selected: *Guest Renter/Renter Logged In/Renter not Logged In* 1. Can set Pickup, dropoff dates for the rental item. *Renter Logged In can resume the below steps. Guest Renter/Renter not Logged In will be redirected to Sign up or Login page to go ahead with the following renting activities:* 1. Can request an item for rental. 2. Can see my items requested for rental in the admin section. 3. Can message an owner. 4. Need to enter payment info when I request renter. 5. Can view the rental receipt and print it. 6. Payment not billed until pickup.

7. Reminded to review the renter/owner after drop-off as appropriate.

Account Management <> UY-5 [OPEN] Bracken

Authentication

- As a user I can login and logout successfully
- As a user I can successfully create an account

Account

- As a user I can edit my profile
- I can edit my payout preferences
- I can change my password under the security tab
- As a user I can view my transaction history
- I can use Trust and Verification to edit and add verifications
- I can edit my Listings

Reviews, Reservations, Messages

- I can review my reviews
- I can view my Reservations
- I can view my Inbox and message with other users

Schedule:	After the plan is approved, tests analysis and test design will occur, followed by implementation. We will have 1 week until the end of class to test. **Entry Criteria** • Dummy Test data will be created to test with • Test Environment will be implemented, alpha Once the above criteria are met, test execution can begin. **Exit Criteria** • All features will have been tested and reported passed • Customers acceptance criteria are met
Monitoring and Control Metrics:	We will be tracking % of features passing testing, utilizing the features identified in "What, Who, How?"
Budget:	We are working with the developers of Yoodlize for payment... so far nothing.
Test Documentation Guidelines:	Standard JIRA test cases will be used. Testers will do deep level testing in their own test area. Here is a doc-link to all the user profiles created for testing purposes: https://docs.google.com/document/d/1TXBqY1I6DRSZ1zK_tCPo7kz9yrNU94LD0YQxqyb_H8g/edit?usp=sharing Link all test cases to this test plan. All bugs need to have a test case linked as "Tested By" Create a new test case and update our test plan as necessary if there is not a test case currently covering the bug. Only update the test plan 1 at a time.

	tests	UY-32	Listing Item for Rent Suite	Open
	is tested by	UY-57	Adding Photos Error with Photos Present	Open
	is tested by	UY-58	Cover Photo	Open
	is tested by	UY-59	PNG Image File Types	Open
	is tested by	UY-60	GIF's as an Image File Type	Open
	is tested by	UY-61	Larger Photo File Will Not Load	Open
Epic Link:	Utilize Yoodlize Epic			
Test Preconditions:	- Can a user upload JPEG files? - Can a user upload PNG files?			

- Can a user upload GIF's and if so, do they play?
- Can a user select the listing cover photo?
- Can a user edit the photos after the listing has been created?

Test Script:	1. Create a new listing and add JPEG's as the images. 2. Create a new listing and add PNG's as the images. 3. Create a new listing and add Gif's as the images. 4. Try adding a combination of JPEG's and PNG's as the images. 5. Try adding a combination of JPEG's and GIF's as the images. 6. Try adding a combination of PNG's and GIF's as the images. 7. Try editing the photos of a previously created listing and republishing it. 8. Try changing the cover photo.
Test Postconditions:	It is expected that a user will be able to add photos of all types and file sizes as the listing photos for the item they are listing. It is also expected that the owner user will be able to edit all photos after creating the listing, including changing the cover photo.

Description

This test will be to check the boundaries of types and sizes of photos that can be added to listings during the listing creation process.

[UY-54] Address Map Accuracy Created: 08/Jan/19 Updated: 08/Jan/19

Status:	Open
Project:	Utilize Yoodlize

Original Estimate:	Not Specified		

Issue links:	**Test**				
	tests	UY-32	Listing Item for Rent Suite		Open
	tests	UY-38	Bypassing Publishing errors/warnings/...		Open
	is tested by	UY-50	Not Loading Next Page		Open
Epic Link:	Utilize Yoodlize Epic				
Test Preconditions:	• What is minimum and maximum allowable characters for input box if any? • What character types are allowed?				
Test Script:	1. # Create a new listing. 2. Fill in all required information until you get to the "Rental rules" page. 3. Add additional rules of various types (short, long, different character types, copy and paste large amounts of information, etc.). 4. Complete the listing creation. 5. Check your listing from a renters perspective to see what the results are. 6. Repeat listing creation as many times as needed to complete all boundary values.				
Test Postconditions:	The software should allow an owner user to create a title of their choice within reasonable character length as to not have the title confused with the description.				

Description

This test will be to check the boundary values of the "Title" input box.

Comments

Comment by Jared Shepherd [08/Jan/19]

You can bypass the boundary value limits of minimum 3 characters in title.

[UY-39] Additional Rules Boundary Values Created: 07/Jan/19 Updated: 07/Jan/19

Status:	Open
Project:	Utilize Yoodlize
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Original Estimate:	Not Specified		

Issue links:	**Test**			
	tests	UY-32	Listing Item for Rent Suite	Open
	is tested by	UY-41	Lengthy Additional Rules	Open
	is tested by	UY-40	Upload Documents Option?	Open
Epic Link:	Utilize Yoodlize Epic			
Test Preconditions:	- What are the boundary values if any? - What if an owner user has pre-written documents or legal documents that he/she would like to upload (PDF, Word Doc, Google Doc, etc.)? - Is there an upload documents option?			
Test Script:	1. Create a new listing. 2. Fill in all required information until you get to the "Rental rules" page. 3. Add additional rules of various types (short, long, different character types, copy and paste large amounts of information, etc.) 4. Click the "ADD" button. 5. Check results on the same "Rental rules" page. 6. Complete the listing creation. 7. Check your listing from a renters perspective to see what the results are. 8. Repeat listing creation as many times as needed to complete all boundary values.			
Test Postconditions:	Software should allow an owner user to add additional rules as they see fit. An owner user should be able to just type the information into the input box, copy and paste or upload a pre-written document.			

Description

This test will be to check the boundary values of the "Additional Rules" input box and check to see if this functions smoothly.

[UY-37] Description Boundary Values Created: 07/Jan/19 Updated: 08/Jan/19

Status:	Open
Project:	Utilize Yoodlize
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

	tests	UY-32	Listing Item for Rent Suite	Open
	is tested by	UY-36	Having to Refresh the Page to Confirm...	Open
Epic Link:	Utilize Yoodlize Epic			
Test Preconditions:	• Where does the owner user need to be in the site for this action to take place? • Is the owner the only one who has access to delete his/her own listing? • When a listing is deleted from an owner users dashboard, is it still visible on the home page or through the search function?			
Test Script:	1. Navigate to your previously created listings. 2. Choose a listing you would like to delete. 3. Click the "X" in the top right-hand corner of the listing which is only visible when you mouse over the listing. 4. Select "Yes" when you see the question "Are you sure you want to delete this?" pop-up. 5. Check to see results. 6. If listing still appears to be there, refresh the page or navigate away from the dashboard and navigate back to it.			
Test Postconditions:	The software should allow an owner user to delete any previously created listing at any time as long as they follow the deletion process provided on the site.			

Description

This test will be to check and see if an owner user can delete previously created listings and see if that process runs smoothly.

[UY-33] Editing and Republishing Listings Created: 07/Jan/19 Updated: 07/Jan/19

Status:	Open
Project:	Utilize Yoodlize
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Type:	Test Case	Priority:	High
Reporter:	Jared Shepherd	Assignee:	Unassigned

	tests	UY-32	Listing Item for Rent Suite	Open
	is tested by	UY-34	Publish Function after Editing.	Open
	is tested by	UY-38	Bypassing Publishing errors/warnings/...	Open
Epic Link:	Utilize Yoodlize Epic			

Test Preconditions:	• Can the owner user edit/update ALL information in the listing? • Does the map update with an address change? • With an address change to one listing, does it update all of the owner users other listings? • Can you republish a listing after updating any information?
Test Script:	1. Log into account. 2. Create a new listing through the provided process. 3. Navigate back to your created listings. 4. Select the "Edit" button on one of the listings. 5. Edit any information in the listing. 6. Select the "Publish" button 7. Navigate back through the site to the newly updated/edited listing. 8. Check to see if the information has been updated.
Test Postconditions:	It is expected that an owner user can modify any and all information in a listing and republish it or have the modified information saved in some way to update the listing.

Description

This test will be to check and see if an owner user can edit and republish already created listings.

[UY-31] Listing Items for Rent Created: 07/Jan/19 Updated: 08/Jan/19

Status:	Open
Project:	Utilize Yoodlize

	is tested by	UY-62	Listing Items without Verify Email or...	Open
	is tested by	UY-32	Listing Item for Rent Suite	Open
	is tested by	UY-52	Terms and Conditions Doc Bugs	Open
Epic Link:	Utilize Yoodlize Epic			
Test Preconditions:	• Are there any filters as to what can be listed? Inappropriate items, people, explosives, illegal items, etc.? • Are there restrictions to adding images. (photo file types like JPEG, PNG, GIF and image sizes?). • Multiple listings of the same thing? • Is there anywhere for other users to report bad/inappropriate listings?			

	• Any way to verify legitimacy of listing?
Test Script:	1. Log in to account. 2. Select the "List Product" tab at the top right-hand side of the site. 3. Select the "GET STARTED" button. 4. Follow the provided process of listing an item or multiple items for rent. 5. ** Test the above mentioned boundaries and requirements throughout the listing process. 6. Create multiple listing if necessary to cover all boundaries and requirements.
Test Postconditions:	The software should allow owner users to list their items as needed for rent. It should allow owner users to provide all necessary information to possible renters. It should provide owner user all legal policy information so they know and understand their responsibility, The responsibility of the renter and the responsibility of Yoodlize. The software should be a simple guide for the owner user to understand what information to provide possible renters and how to provide that information to the renters.

Description

This test will be to check the boundaries of listing an item(s) for rent.

Test Script:	**Logged in user**			

- As a logged in user navigate to the homepage.
- Browse through the items and select an item for rent.
- Select dates for pick up and drop off request of the item.
- Click on request button to request for rental on the selected dates and click next.
- This navigates you to the confirmation page to enter the following details:
  - About your rental - describe what you'll use this rental for
  - Payment Info - To enter credit card details
- Click pay now and confirm the rental request
- You will be redirected to the reservation confirmation page which will have the following details and also receive a confirmation email:
  - Reservation code and receipt
  - Pick up and drop off dates and address
  - Host info and messaging options
  - Billing info
  - Link to the rental listing

Guest Renter/Renter not Logged In

- Navigate to the homepage.
- Browse through the items and select an item for rent.
- Select dates for pick up and drop off request of the item.
- Click on request button will redirect you to Log in if you already have an account or sign up as a new user if browsing as a guest user.
- Click on request button to request for rental on the selected dates.
- This navigates you to the confirmation page to enter the following details:
  - About your rental - describe what you'll use this rental for
  - Payment Info - To enter credit card details
- Click pay now and confirm the rental request
- You will be redirected to the reservation confirmation page which will have the following details and also receive a confirmation email:
  - Reservation code and receipt
  - Pick up and drop off dates and address
  - Host info and messaging options
  - Billing info
  - Link to the rental listing

Test Postconditions:	Logged in user should be able to rent an item, guest users should be able to sign up and continue their activity, returning users should be able to sign in and resume their rental request.

Description

A account holder can request an item for rental.

Issue links:	**Test**			
	tests	UY-33	Editing and Republishing Listings	Open
	is tested by	UY-37	Description Boundary Values	Open
	is tested by	UY-44	Title Boundary Values	Open
Steps to Reproduce:	1. Edit any previously created listing through your "Dashboard". 2. Have less than 10 characters in the Description input box. 3. Clear the rate input box so there is nothing in it. 4. Navigate to the home page. 5. Find your listing from the homepage in whatever category it was in. 6. Check to see if information matches the changes you made while editing the listing.			
Expected Result:	It is expected that while there is a publishing error shown, an owner user cannot save edited information and have the listing visible to renters.			
Actual Result:	An owner user can edit information and bypass any publishing errors that are present on the "Publish" page of editing the listings.			
Epic Link:	Utilize Yoodlize Epic			

Description

An owner user can bypass the publishing error notifications by simply editing whatever information they want in a listing and then navigating out of the editing of the listing. This will allow users to republish previously created listings that don't meet the requirements set in place for publishing the listing. Please see attached images below.

[UY-36] Having to Refresh the Page to Confirm a Deletion Created: 07/Jan/19 Updated: 07/Jan/19

Status:	Open
Project:	Utilize Yoodlize
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Type:	Bug	Priority:	Low
Reporter:	Jared Shepherd	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original Estimate:	Not Specified		
Environment:	Windows PC with chrome.		

Issue links:	**Test**		
	tests UY-35	Deleting Listings	Open
Steps to Reproduce:	1. Choose a previously created listing to delete. 2. Mouse over the listing and click the "X" in the top right-hand corner of the listing box. 3. Click the "Yes" button when the question, "Are you sure you want to delete this?" pops-up. 4. Check to see if listing was deleted.		
Expected Result:	It is expected that the page would automatically refresh after the user completes the listing deletion process so they can easily confirm the listing has been deleted without any confusion.		
Actual Result:	Owner user has to manually refresh the page or navigate away from the dashboard listings and navigate back to them to confirm the listing has been deleted.		
Epic Link:	Utilize Yoodlize Epic		

Description

After deleting a listing, it still appears to be visible and part of your listings. The owner user has to manually refresh the page or navigate away from the page and navigate back to it to confirm the listing has been deleted.

[UY-34] Publish Function after Editing. Created: 07/Jan/19 Updated: 07/Jan/19

Environment:	Windows PC with Chrome.		

Attachments:	🖼 Publish Listing Failure with no Description of Why.JPG		
Issue links:	**Test**		
	tests UY-33 Editing and Republishing Listings		Open
Steps to Reproduce:	1. Select the "Edit" button on one of your previously created listings. 2. Edit the description. 3. Navigate to the "Publish" page. 4. Select the "Publish" button. 5. Check to see if it produces an error or if it allows this action to happen.		
Expected Result:	It is expected that the an owner user would be able to edit any information in one of their previously created listings and republish it.		
Actual Result:	Selecting the publish button after editing some of the information sometimes causes an error. Please see attached image.		
Epic Link:	Utilize Yoodlize Epic		

Description

Republishing an edited listing sometimes does not work by way of clicking the "Publish" button. The edited information does however save even if the "Publish" button does not officially allow you to republish it.

[UY-30] Map shoots off to the coast of Africa Created: 06/Jan/19 Updated: 09/Jan/19

Status:	Open
Project:	Utilize Yoodlize
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Type:	Bug	Priority:	Medium
Reporter:	Douglas Wretberg	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original Estimate:	Not Specified		
Environment:	Google Chrome Version 71.0.3578.98 (Official Build) (64-bit)		

	macOS Mojave Version 10.14.2 (18C54)

Issue links:	**Relates**		
	relates to	UY-3	Manual test for browsing Yoodlize	Idea
Steps to Reproduce:	I have had some success reproducing this but by going to the "Browse" section and dropping down the filters bar. Use the "Ratings" filter only (I clicked 3 stars) and apply the filter.		
	Go to "Browse" page, and use "Advanced search" feature. set min price to $500 and max price to $10000 and click the "Apply" button.		
Expected Result:	The map should not be affected unless user is interacting with it directly, or the map zooms out only far enough to view locations of products that appear in the filtered results.		
Actual Result:	Map will randomly shoot over to the ocean, depending on what filters are used to narrow results but user can still zoom out.		
	Map will randomly shoot over to the ocean, but if User attempts to zoom out (requires 8 clicks of the "-" zoom out button) the map stops working.		
Epic Link:	Utilize Yoodlize Epic		

Description

Filters can sometimes make the map shoot over to the South Atlantic Ocean off the coast of Africa, and sometimes the map stops functioning altogether.

[UY-29] products on Yoodlize home page not listed in "See All" section Created: 06/Jan/19 Updated: 06/Jan/19

Issue links:	**Relates**	
	relates to UY-3 Manual test for browsing Yoodlize	Idea
Steps to Reproduce:	1. On Yoodlize homepage look at the "Fashion" category and use the scroll arrow to move product list over until you see the "Test Things" listing.	

2. Click "See All" and look for "Test Things" listing.
3. If you go back to to Yoodlize homepage and find the "Test Things" listing again and click on it, it does go to a product page.

Expected Result:	All links should be visible under "See all" for a category.
Actual Result:	"See all" section doesn't seem to be showing all listings.
Epic Link:	Utilize Yoodlize Epic

Description

Test Things is listed under "Fashion" on the main page and it doesn't have an image, but when you click on "See all" for the Fashion category it is not in the listing. Not sure if the item has been deleted but it is still showing up on the main page or if "See all" is not showing all listings. Same thing is happening with https://alpha.yoodlize.com/details/620 in the "Outdoor Gear" category.

[UY-28] Page navigations buttons break Created: 06/Jan/19 Updated: 06/Jan/19

Status:	Open
Project:	Utilize Yoodlize
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Original Estimate:	Not Specified		
Environment:	Google Chrome Version 71.0.3578.98 (Official Build) (64-bit) macOS Mojave Version 10.14.2 (18C54)		

Issue links:	**Relates**		
	relates to UY-3	Manual test for browsing Yoodlize	Idea
Steps to Reproduce:	1. On Yoodlize homepage, find the "Sporting Goods" section and click the "See All" link. 2. Scroll to bottom of page and click on the link for the second page of listings. 3. Use your browsers to navigate back to previous page. 4. Scroll to bottom of page and notice that the first page is highlighted even though (look at URL) you are on the second page. 5. Try clicking on the "1", or the "Back arrow" link to navigate back to the first page of listings.		
Expected Result:	When I navigate back to a list of products, it should take me back to last page I was on and the links to navigate between different pages should still work		
Actual Result:	The links to navigate between 1st and 2nd page break and you have to use your browsers "Back" button to navigate back to 1st page.		
Epic Link:	Utilize Yoodlize Epic		

Description

When you are in the "see all" section of a category, go to the second page of listings and click on a product. if you navigate back to the second page of listings the buttons at the bottom to navigate between first and second page of listings break.

[UY-27] Search bar doesn't bring up all listings searched for. Created: 06/Jan/19 Updated: 09/Jan/19

Status:	Open

Issue links:	**Relates**			
	relates to	UY-3	Manual test for browsing Yoodlize	Idea
Steps to Reproduce:	1. When you first open Yoodlize app it asks permission to know your location, click the allow option for this issue to be present (I think). 2. On homepage scroll down to any category and use arrows to find a listing for a product in a different state. 3. use search bar at top of page to search for the item name and capitalization does not affect the search.			
Expected Result:	When searching, all products that match search terms should display, and be listed by distance. Customer should then use filters to narrow search results.			
Actual Result:	Search bar does not bring up listings for all items, so users are not able to see all products on website.			
Epic Link:	Utilize Yoodlize Epic			

Description

When I search for items that are I know are close to me (within 20 miles) they don't always show up in the search results.

[UY-25] Location of Item doesn't match to location on map Created: 06/Jan/19 Updated: 09/Jan/19

	relates to	UY-3 Manual test for browsing Yoodlize	Idea
Steps to Reproduce:	1. Using the link provided go to listing for Macbook 2. Check location between product title and product photo (screen shot attached below). 3. Look at the map on the same page, zoom the out map as far as it will allow and look for location (which is Dearing KS).		
Expected Result:	Location listed should match location on map.		
Actual Result:	Locations do not match.		
Epic Link:	Utilize Yoodlize Epic		

Description

If you look at a product in between the title (MacBook) and the photo of product it say the location is in Utah. If you zoom out the map on the product page, you will see it says the location is Dearing KS.

[UY-24] "414 Request-URI Too Large" displays with to much search text Created: 06/Jan/19 Updated: 09/Jan/19

Status:	Open		
Project:	Utilize Yoodlize		
Component/s:	None		
Affects Version/s:	None		
Fix Version/s:	None

Issue links:	**Relates**		
	relates to	UY-3	Manual test for browsing Yoodlize	Idea
Steps to Reproduce:	• Go to text generator and change length of text string to 10000. • copy text and past it into Yoodlize search bar and hit enter.
Expected Result:	The search bar should limit the number of characters that can be entered in (maybe to 100 characters max). so that user isn't taken away from Yoodlize website.
Actual Result:	User can enter in very large amounts of text which results in error message "414 Request-URI Too Large" being displayed.
Epic Link:	Utilize Yoodlize Epic

Description

If you enter large amounts of text into the search bar you are taken to a "414 Request-URI Too Large" page. User is able to navigate back to Yoodlize.
